

- 4 different mice

- Mouse Prints

- Description of Ergonomics for each Mouse

Amazon

- All of the "A" sector, B^1 : B^2 , C^2 : C^3 were used on this mouse.
- E^1 and all of the palm section were covered except F^4 .
- This mouse I liked the best.

Mac

- For this mouse all of the top sectors for each finger were applied (E^1 , A^1 , B^1 , C^1) except the pinky.
- Half of F^1 : F^2 were covered as well as all of F^3 and vaguely some of F^4 .

Lenovo

- The lenovo had all of the thumb sectors and majority of the "A" : "C" sectors.
- B^1 and some of D^2 were applied on the mouse.
- F^3 the second half of F^1 : F^2 , and "some" of F^4 was applied.

Microsoft

- All thumb sectors, all of "A", Upper "B", C^2 : C^3 , and D^2 were applied.
- Primarily F^1 : F^2 were covered.
- This was my least favorite.
